

Sprint #1 Report  
Atheneum  
4/28/17

**Actions to stop doing:**

Debating between technology to use: we have reached a consensus.  
Creating dependent or codependent tasks: modularize development

**Actions to start doing:**

Commit and push to github more frequently: this will prevent accidents in which progress is lost  
Schedule 1-2 longer meetings to actually work out problems group members might be facing as a team.  
Be more active in the management of the Trello Scrum Board

**Actions to keep doing:**

Meeting regularly: This has worked out well for keeping everyone on the same page  
Stay active on group communication platforms (like Slack) to share resources with each other  
Utilize the share Treehouse account to hone technical skills

**Work completed/not completed:**

Completed:

- Deciding between implementation technologies
- Creating prototype website with upload/download functionality

**Work completion rate:**

Total number of user stories completed: 1/1 stories  
Total number of estimated ideal work hours completed: 4 hours/day  
Total number of days: 12
